Module 3: Advanced JavaScript Concepts

Lesson 5: Asynchronous Programming with Promises

In this lesson, we'll explore asynchronous programming in JavaScript using Promises. You'll learn how to handle asynchronous operations, chain promises, and manage errors effectively.

Duration: 15 minutes

Previous Lesson

Next Lesson

Course Modules

- Introduction to JavaScript
  - Variables and Data Types
  - Functions and Scope
  - Control Structures
- DOM Manipulation
  - Selecting Elements
  - Event Handling
  - Dynamic Content
- Advanced JavaScript
  - Closures and Scope
  - Prototypes and Inheritance
  - Asynchronous Programming
  - ES6 Features
- JavaScript Frameworks
  - React Basics
  - Vue.js Fundamentals
